

ARMAND-CÉSARI STADIUM

Furiani, Corse

Extension of the Armand-Césari Stadium

The Bastia metropolitan community wanted a renovated stadium, integrated into the landscape, with the capacity to host performances.

The design work focused on achieving harmony between the architecture of the stadium and the natural, coastal, and hilly site. A textile membrane roofing system was chosen to meet the site's specific characteristics, while also adhering to the functional requirements and climatological factors: shading of the pitch, resistance to seismic activity, and enhancing comfort. This roof restores coherence to the stadium, protecting it from the prevailing north-west winds, and gently receding to the east to provide spectators with a maritime horizon where the silhouettes of cypress trees stand out Mediterranean symbols of ancient sports and vigilant guardians of the site's memory.

Client

Communauté d'Agglomération de Bastia

Program

Extension and Upgrading of the Armand Césari Stadium. Construction of a Metal-Textile Roof. Creation of Facilities for Hosting Cultural Events. Stadium with a capacity of 22,000 seats (17,000 in sports configuration, 26,000 in event configuration).

Surface

3,824 m²

Cost of Work

15,500,000 € ex-tax

Status

Delivered in 2012
