

RENARDIÈRES SPORTS COMPLEX

Courbevoie, France

Located at the heart of the Grand Paris metropolis, the new gymnasium places Sports at the forefront of the dense and multifunctional urban landscape of La Défense. This ambitious project, positioned at the intersection of social and urban challenges, directly enhances the quality of life for city residents.

Urban Integration

Situated in Courbevoie as part of the Seine-Europe urban development project, the design leverages the site's constraints to create a unique sports facility. Perched above a parking structure, with a limited footprint and surrounded by high-rise buildings and an access bridge to the La Défense esplanade, the complex explore new possibilities in sport architectural design. Organized across four levels, the inclusive gymnasium provides an innovative, accessible solution :

- Level 0 : Dance studios, Dojo, Table tennis room.
- Level 1 : Sports field of the Large Multi-sports Hall.
- Level 2 : Public seating above Changing rooms, Clubhouse
- Level 3 : Partial technical/staff area.

A kind of LEGO construction, connected by a four levels hall, forming the backbone of the project.

Innovative design: A Central Role for Sports in the Grand Paris Metropolis and Public Experience

Through its carefully interwoven volumes and thoughtful urban openings, the project strengthens the connection between the sports complex and the city (...)
